Description: Securing cruciform/10

Content:

- 10 Cruciforms, aluminium
- 40 Anchor blocks, aluminium
- 40 M8 x 14 screws hexagon socket, stainless steel

Securing cruciform/10

The **securing cruciform**, made of weather-resistant aluminium, is used in conjunction with flat-roof kit/10 (Art. No. 221 199) to accommodate lateral forces.

One securing cruciform is needed per mounting rail length (~ 6.15 m).

When using the securing cruciform, the distance between supports is 1.04 metres.

Features

- Ensures stability – even in large-scale installations
- Weather-resistant aluminium

Aluminium_{Natural}: Plate finish (similar to RAL 7035)
