

Article number: 231 162
Description: Snow load profile/9

Content: 9
Length ~ 6150 mm
H x W = 33 x 40 mm
 $I_x = 2.19 \text{ cm}^4$
Material: Aluminium_{Natural}

Snow load profile/9

The **snow load profile/9** is used to increase the load-bearing capacity of Sharp and Schüco PV modules for module sizes up to 8 kN/m². When snapped onto mounting rails 1-3, the snow load profiles, together with a rubber strip (Art. No. 231 163 or 231 164), provide extra support on the underside of the relevant PV module to suit load requirements.

Features

- Quick and easy assembly
- Weather-resistant aluminium
- Snap-on fitting
- Compatible with different PV modules
- Proof of structural integrity

Aluminium_{Natural}: Plate finish (similar to RAL 7035, light grey)
