2 M8 nuts

Article number: 231 212
Description: Roof anchor
pantile-4-AI/100

Content: 100 roof anchors

Roof anchor pantile-4-AI

The pantile-4-AI roof anchors are mounted and secured on additional mounting battens. The mounting rails are screwed onto these roof anchors.

The screws (Spax or similar) for fixing the additional mounting battens to the cross-battens/roof rafters are to be provided by the customer.

The position of the roof rafters must be taken into account when fixing the pantile-4-AI roof anchors. There is then usually no need to use the mounting battens supplied in the roof-mounted installation kit.

The fixing screws for the pantile-4-AI roof anchors must be provided by the customer.

Features

- Stainless steel interlocking bolt (pantile-4-AI)
- Aluminium roof anchors
- High mechanical load-bearing capacity
- Easy to align mounting rails
- Height-adjustable incorporation of base rail
- Can be installed irrespective of position of rafters (pantile-4-AI/100).
- Error-tolerant assembly of pantile-4-AI roof anchors, which can be moved horizontally along the mounting plate.
- Tested in accordance with EN 12 975-2

To fix the roof-mounted system to a pantile roof. When using the pantile-4-AI (Art. No. 231 203) roof anchor, the interlocking bolt is pre-fitted to the roof anchor with the washer and M8 nut.
