

Article number: 296 518
Description: Sealing roller

Content: 1 Seal roller for wedge gasket

Seal roller

The **seal insertion roller** is used to roll in the wedge seal that runs around the frame of the solar element. The roller is used to roll in the wedge seal (once the cover plates have been put in position) and is an excellent tool, particularly with integrated roof installations.

Features

- Simplifies the rolling in of the wedge seal
- Shortens installation times
- Easy to use
- Facilitates correct positioning of wedge seal

Article number: 221 088
Description: Carrying handle for flat-plate collector

Contents: 4 Carrying handles for collectors*
8 M8 x 14 screws
Hexagon socket**

Material:
* Aluminium
** Stainless steel

Carrying handles for flat-plate collectors

The **carrying handles for flat-plate collectors** are useful when transporting solar elements for installation. The handles are screwed onto the element quickly and easily using two screws over the surrounding helical groove. They are **not** fixing points for installation using cranes.

Features

- Easy to use when transporting solar element
- Excellent ergonomics
- Shortens installation times
- Simple, secure fixing of handles to solar elements using helical groove
