

# CASE STUDY: INSTALL SOLAR

## How Install Solar got on with EVBox

Install Solar have operated out of Livingston, Scotland with over 20 years experience in the Solar industry. They recently installed their first EV Box charge point and we wanted to share you their review of their first installation of the Elvi.

We spoke to Stevie Bell, Managing Director of Install Solar, who told us how seamless the new install process was...

*"There were very little difficulties as the instruction manual was found to be extremely clear and concise. All in the all, our first EV Point was installed in about 1-2 hours."*

Install Solar supply and install the latest in solar power, solar panels, inverter and battery storage technologies across Scotland and North England.

### THE SYSTEM:

- [EVBox Elvi Charge Point](#)
- [310W JA Solar Panels](#)
- [Solis 5kW Hybrid Inverter](#)
- [9.6kWh Pylon Tech Batteries](#)

#### Location:

Newcastle, UK

#### Client:

Private Residence

#### EV Charger:

EVBox

#### Inverter:

Solis

#### Battery:

Pylon Tech

#### Panels:

JA Solar
