## **Clamping Approval: CLICKFIT EVO Racking Systems**

Dear Sir or madam,

Hanwha Qcells permits ESDEC CLICKFIT EVO rooftop racking system with rails for use with all Hanwha Qcells modules when in accordance to the mounting options section of the Hanwha Qcells installation manual.

The maximum loads of the mounting and clamping system has to be evaluated by the mounting system supplier (ESDEC). Loads for the mounting system shall prevail if they are less than the according module values as detailed in the module installation manual.

The clamps have to be stable in the long-term, securely affix the module to the mounting rail under the specified loads and satisfy the structural requirements of the installation site. The clamps must also not damage or deform the module.

Module warranties provided by Hanwha Qcells shall apply only for listed modules that are installed, operated and maintained in accordance with the relevant product information, in particular the specifications, installation instructions and other product documentations provided by Hanwha Qcells and ESDEC.

Best regards.

Your Hanwha Qcells team
