

Statement

To: whom it may concern

We JA Solar, are aware of the influx of non-standard/ fake modules being supplied by various companies under a false JA Solar brand, these modules are not endorsed by JA Solar and hold no association with the JA Solar brand. We have noticed multiple JA Branded Modules in South Africa which from checking are not produced by JA Solar. We have also noticed multiple companies saying they have JA Stock in their warehouse. Note that we are busy taking corrective and Legal action to limit such practices and only stock through a registered JA Solar distributor / EPC will be valid in terms of warranty obligations.

Yours Sincerely,

Shanghai JA Solar PV Technology Co. Ltd.
