

Green energy • Safe energy • Solar energy

FREE hot water from the sun

What is the SOLiC 200?

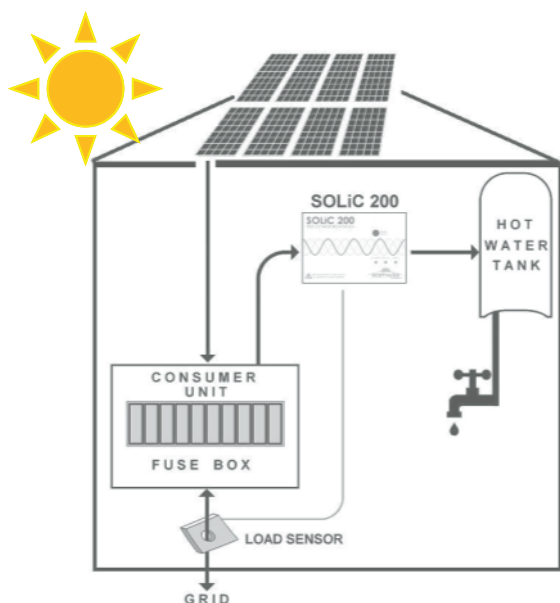

The award-winning SOLiC 200 automatically converts energy generated by your existing PV panels into hot water by diverting excess solar power to the immersion heater before it's exported to the national grid. Simple to use and maintenance free, the SOLiC 200 is self contained, easy to install and can save you hundreds of pounds over the course of a year.

The SOLiC 200 comes with a 10 year return to base warrantee and has been designed, constructed and tested in Britain to CE standards. The unit can be installed quickly and easily by a qualified electrician without the need for plumbing alterations.

Key features

- Provides free hot water from PV panels
- Saves hundreds of pounds on energy bills
- Returns on investment in less than 3 years
- Includes 10-year return to base warrantee
- Operates with zero threshold export to the grid
- Complies with CE and British Standards
- Reduces your CO2 emissions
- Engineered to last 25 years
