Special features

T-STAR plus

Positive and secure fit of the BIT and better driving, e. g. when working overhead.

Washer head

Ensures higher pull through forces, allowing for larger screw distances.

Ground serrations

For quick and secure fastening.

4CUT point

No pre-drilling (wood-dependent), its point effectively reduces the splitting effect. The square end pushes aside the fibre of the wood and reduces the screwing-in torque.

Stainless steel A2
