

Control devices in your home with ease using the GivEnergy Smart Plug.

The Smart Plug is a new member of the GivEnergy family. Compatible with the GivEnergy App or Amazon Alexa, the Smart Plug is a great addition to your home and GivEnergy ecosystem.

Its LED power button allows for control even when disconnected from the internet. This provides easy control of your devices and allows you to check the GivEnergy App's integrated Smart Tariff which will show individual appliance costs.

#### WiFi Remote Control

Connect and control your Smart Plugs from anywhere in the world.

#### App Controlled

Control your Smart Plug via the GivEnergy App or with Alexa.

#### Load Breakdown

Using multiple Smart Plugs will breakdown the load in your property, so you can see what energy individual appliances are using.

#### Time / Scheduling

Schedule the smart sockets on or off to have certain appliances on during the day.

# Smart Plug

## POWER SPECIFICATION
