Integration of VELUX skylights with GSE Integration BIPV mounting system

- Functional solution to combine daylight and fresh air with power generation
- The principal colour of the flashing ODL developed for GSE Integration system is grey .
- The ODL flashings is available in black and can be combined with window type GGL MK06 and MK08 2570 black (RAL 9005) for optimal aesthetics with the photovoltaic system
- 100% waterproof system
- Compatible with several dimensions and brands of photovoltaic panels
- Choose the configuration and the finish of the skylights
- Perfectly adaptive with the available window decoration and sun blinds
- GSE Integration supplies the necessary side flashings for the ODL connection
- The installation of the ODL flashings offers flexibility with more than 20 mm tolerance
- Quick assembly within GSE Integration array.
