

WHY FOX?

Fox ESS operates within a global conglomerate, with significant ownership by Tsingshan Group (Global Fortune 500 company) as well as UK stakeholders. Together, we rank as the world's leading nickel producer and among the top four lithium resource holders worldwide. This unique synergy allows us to maintain a vertically integrated and secure supply chain. From sourcing raw materials to crafting battery cells and complete energy storage solutions, we control the entire production process.

SUPERIOR SERVICE

Fox ESS offer locally based service and support. In the UK we have a dedicated service and support service based from our national service centre. All calls are answered locally by our team of technicians, providing immediate, expert support when you need it most.

Elite Installer Program

We do not require that installers are pre-certified to install our products owing to the simple installation process and our local backup and support. However, we do encourage installers to attend our free installer training offering immediate access to our Elite Installer Program, offering a range of benefits.

SUPERIOR PRODUCTS

Our market-leading products provide unrivalled levels of performance. For example, our K Series single-phase hybrid inverter, boasting 4 MPPTs, can deliver up to a colossal **10.5kW of continuous charge/discharge**.

Full Product Suite

From 600W dual-panel microinverters to 110kW 3-phase inverters, and with a range of single-phase and 3-phase hybrid solutions up to 30kW, we've got you covered.

FLEXIBLE & SCALABLE

Fox ECS Series batteries are wireless, plug-in high-voltage battery modules available in **2.88Wh, 4.14kWh & 4.66kWh** variants. Batteries can be stacked in series for a truly scalable solution.

Scale Your Storage

Single-Phase **5.76kWh —>>> 32.62kWh**
Three-Phase **8.64kWh —>>> 83.88kWh**

Multiply these figures by **x10** by installing inverters in parallel

EASE OF INSTALL

Our products are engineered for quick installation, offering installers a streamlined process. The batteries connect seamlessly in series without requiring external cabling, incorporating built-in fuse protection. Single-phase inverters easily link to the power supply using a straightforward CT clamp, simplifying the commissioning process to ensure quick and hassle-free setup.

easy battery connection
